

INSTRUCTION SHEET

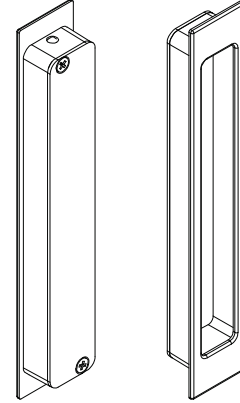

INSTALLATION GUIDE DS575/SS and DS575/A Flush Pull

Option A:
DS575/SS
Stainless Steel 316

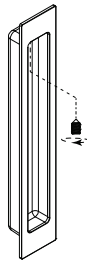

Option B:
DS575/A
Aluminium

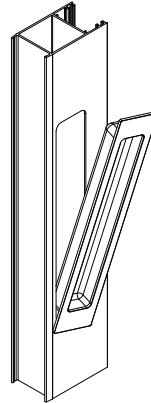

1

- 1) Ensure that the point of the grub screw is not protruding
- 2) Use a standard 3mm hex head allen key to unwind if necessary

2

- 1) Angle the flush pull and lower the side with the wedge into the cutout. N.B The grub screw should be positioned on the top
- 2) Pivot the top end in until the face plate rests on the extrusion.

3

- 1) Fasten the flush pull in place using a standard 3mm hex head Allen key.
