- Contemporary handle design
- Available in left and right handed openings

## AVON SERIES | SLIDING DOOR LOCK

# The Avon Sliding Door Lock sets the industry standard for aesthetic appeal, corrosion resistance and reliability.

The Avon Sliding Patio Door Lock uses the Doric 'Switch' chassis system offering strength, durability and reliability. Using a robust chassis and furniture, the AVON with its contemporary design style sets the industry standard for aesthetics and corrosion resistance.

The Avon Sliding Patio Door Lock, available in latch, lock & dummy applications makes locking a door as simple as flicking a 'switch'.

## ADVANTAGES

- Twin latch lock
- Die cast chrome hardened tongues give added security
- Metacom™ construction cover and chassis deliver excellent resistance to corrosion
- Incorporates anti-crash feature to avoid damage to hook tongues and keeper
- Utilises New Zealand industry standard 125mm door preparation detail, allowing the Avon to retrofit most existing sliding patio door locks
- Unique face mounted switch action for ease of operation
- The switch function handed for side by side (left and right) installation
- Packers available as an optional extra

## AVON SERIES | D PULL HANDLES

**Designed by Doric to be aesthetically pleasing while tough enough to withstand the rigours of daily living.**

The Avon D Pull handles are suitable for residential sliding door suites. The range can be kitted to your requirements or each available to be ordered stand alone.

The DN350 Aluminium D Pull and DN351 Slimline D Pull handles are available in a variety of standard powder coat colours with non-standard colours available on request. Choose either a BTB (Back to back) interior/exterior handle set or single sided interior which can be kitted with an exterior DS575 flush pull for applications where an exterior screen door is installed.

The DS1290 Aluminium mortice lock body, available in 30mm or 40mm backset, features twin counteracting beaks to engage an all-metal catch plate providing resistance to jimmying and restrains the door against being lifted externally from its rails. A catch plate drilling jig is also included for exact placement and quick & simple fitting.

A choice of either the Standard keeper or the optional Slimline keeper, and the DS1253 square escutcheon, completes the range.

# AVON SERIES | HINGED DOOR LOCK

Doric's Avon Series hinged door furniture is suitable for use in residential applications and is available in a wide range of durable powder coat colors with 17 degree lever layback.

This lock set increases the clearance between the lever and the door frame, advantageous when opening with a narrow backset mortice lock.

Levers and escutcheon plates are manufactured from high pressure cast zinc, enhancing both strength and durability. Each handle consists of a parallel leaf spring assembly to return the levers to the horizontal position.

Suitable for Euro Cylinder mortice locks with 85mm pitch between lever spindle and the keyed cylinder barrel.

The DS1650 furniture is kitted with Doric DS1265, DS1269, DS1295, and DS1298 mortice lock packs.

## ADVANTAGES

- Lever and escutcheon manufactured from high pressure cast zinc
- Parallel Leaf Spring Assembly spring mechanism
- 17 degree lever shaft layback for greater clearance during opening
- Universal standard 85mm pitch between lever spindle and cylinder barrel
- Non handed mechanism allows for easy selection on site for left or right hand doors
