

DS578

240mm FLUSH PULL

The Doric DS578 Flush Pull offers architecturally styled low profile design to suit aluminium sliding door frames, as well as suitable sliding windows. It offers a near flush surface, raising only 2mm from the extrusion.

Manufactured from aluminium and available with a powder coated colour finish, the DS578 offers superior longevity near coastal environments or in-land and country settings.

ADVANTAGES

High corrosion resistance

Low profile style

Non-handed design
