

DN194 | D PULL

The DN194 D Pull is an elegant architectural styled pull handle ideal for residential living and forms part of the Evolution Door Hardware Range.

Designed for ease of use and simple to install, the DN194 can be installed on hinged and sliding entry doors including timber doors.

The DN194 can be easily kitted with the DN1290 Mortice Lockbody and DS1255 Escutcheon for a great entry lockset combination.

ADVANTAGES

Corrosion Resistant - Manufactured from Aluminium and powder coated offers a high degree for a quality long lasting handle.

Design Compatibility - Perfect for sliding door applications when coupled with a DS575 or DS578 Flush Pull where an external screen door is included.

Quality Powder Coating - DN194 is available in Satin Black or can be powder coated to requirements upon request.
