SP83

PERFORMANCE MESH FOR SECURITY DOORS

For over 15 years Doric has been working to find a better way to meet all the requirements for mesh, especially around corrosion prevention requirements. Through long term testing and trialling we are now able to introduce a product that combines the best features of other woven mesh types, at a more affordable price point.

SP83 - Performance Mesh for Security Doors.

The realisation of 15 years of development, testing, refining and trialling, now available from Doric Products.

Salt bath tested to 6000 hrs
(Australian Standard: 1000 hrs)

**Provide superior corrosion
resistance performance**

Tested for flatness and squareness
Every batch measured for squareness
to +/- 5mm over 2.4m x 1.2m sheet

* Warranty conditions apply, see our Care and Maintenance

FOR SECURITY DOORS

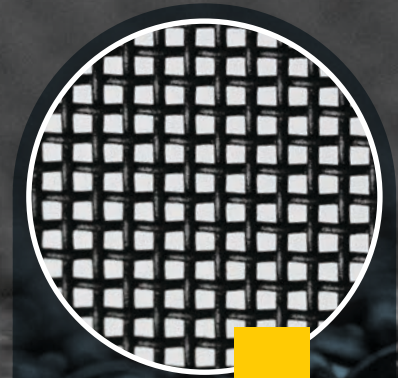

**TESTED:
IMPACT TEST**
(AS5039-2008)

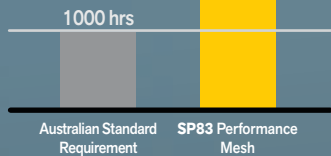

**TESTED: PROBE,
KNIFE & SHEAR**
(AS5039-2008)

**TESTED:
JEMMYING**

**6000
HOURS**
OF SALT
SPRAY
TESTED

Security door mesh is a product that has to meet, and preferably exceed, many standards to be considered 'fit for purpose'.

Highly corrosive environments such as beach front, and industrial locations test the mesh to its utmost and typically, mesh will be tested using a Neutral Salt Spray test for up to 1000 hours.

Since mesh is the most visible part of a door and the element most likely to suffer in highly corrosive environments, we have focused our efforts on ensuring that there is the best possible resistance to corrosion.

SP83 Performance Mesh has been tested to 6000 hours of the same testing with excellent results.

Security door mesh that is no compromise, 'Fit for purpose and value for money'

Mesh Aperture:
Measured at 1.6mm

Design, material and finishing standards have to be matched to local conditions and if your selling doors into coastal locations, corrosion issues are a very real concern, over and above other performance considerations such as knife shear and impact testing.

We all know that price is also critical. More so now than ever before, the right product is going to have to be 'Fit for purpose and value for money'

For over 15 years Doric has been working to find a better way to meet all the requirements for mesh, especially around corrosion prevention requirements and through long term testing and trialling we are now able to introduce a product that combines the best features of other woven mesh types, at a more affordable price point.

! 20 Years Warranty valid with adherence to cleaning schedule stated in our Care & Maintenance. See our website for details.
