

EPEC OVAL | ELECTRONIC PIN
ENTRY CYLINDER

The EPEC Oval provides a multi-user PIN code functionality & management for commercial lockbodies.

The EPEC Oval will provide your standard commercial door with a smarter lock. The EPEC Oval replaces traditional Oval cylinders with a digital-key & turn operation; while retaining the existing lock body and handle. This allows users to quickly upgrade without the hassle of replacing an entire hinged door.

While most digital-key entry locks are only a single handle body lock option, EPEC Oval is designed to fit an existing oval cylinder profile and provide a greater choice of handle furniture design and larger range of commercial lock bodies.

The EPEC Oval allows you to create and manage up to 2 separate groups with a total of 12 unique PIN codes; you'll never have to worry about losing a key again or giving anyone access to a site.

PRODUCT DETAILS

APPLICATION	Hinged and sliding commercial lock bodies
MATERIAL	Stainless steel, brass and zinc construction
FINISH AVAILABLE	Satin Chrome
SUITS	Standard oval profile lock bodies
AVAILABLE SIZES	42mm cylinder body

CAM OPTIONS
